

Convenience

If you need a dental problem treated right away, don't worry, you won't need to wait for an appointment or go out of your way. We understand your time is valuable, so we're pleased to set an appointment before normal working hours, during lunchtime or after your child gets out of school. We're also accessible day or night, with live 24 hour answering services - so you can rest easy, knowing that help is never far away.

Confidence

Dr. Charlie Gill has been helping busy people and their families smile for over 25 years! Why do people like you

come from all over Central Florida to see Charlie? First of all, it's for peace-of-mind, knowing you'll receive the

finest care from an experienced professional. You can trust Dr. Gill to employ compassion, understanding and a sure hand in his work, while staying up on all the latest technologies. Dr. Gill is a well respected member of the foremost local and national dental associations.

Care

Our emphasis is on prevention. As well as treating any current needs, we want to help prevent future teeth and gum problems. Little problems should never become big problems - from simple cavities to TMJ disorders. Our goal is for you to keep your teeth for a lifetime!

Remember, you don't have to brush your teeth - just the ones you want to keep! To help you keep up to date with your oral hygiene routine, we send out reminder letters on a regular basis, so you'll never forget to make that very important cleaning or check up appointment.

Concern

Your dental health and safety are our primary concern. We strive to make sure all products we use ourselves and recommend to our own patients, friends and families are American made whenever possible. We believe that these domestic products are safer than those made by the suspect foreign manufacturers we are seeing reported in the news. Our office has the highest OSHA compliance certification for sterilization and heat autoclave is used for all hand pieces and equipment.

Comfort

You should feel comfortable with any dentist you choose for yourself and your family. We strive to make your entire experience as accommodating as possible with convenient parking right at the door, a friendly greeting, a quiet, comfortable lobby, inviting atmosphere and a practiced, skilled professional staff who treat you as if you were one of the family. You are important to us.

When you become our patient, our first job is to set you at ease and eliminate any anxiety you may feel about going to the dentist. We encourage you to ask questions and let us know about any concerns you may have.

We use traditional local anesthetics to prevent pain, more modern medications to help reduce tension and nitrous oxide to help you relax. You can even slip on headphones, to enjoy soft music instead of the sounds of dental work.

We get to know each of our patients as unique individuals who deserve the best personalized treatment possible. Plus, we will work with most insurance companies to help you get the maximum benefit from your insurance plan.

We pledge to take special care of each patient every visit.

A smile is the universal welcome!

A smile happens in a flash, but its memory can last a lifetime.

Your mouth radiates love, joy, affection and wonder, for it gives that which no other of God's creatures can give ~ a smile!
